The Day Caledonian, for Ceylon; Araban, for Manila; Poictiers, for Madras; Melville, for the South Seas; Phantom, for Adelaide; Vixen, for Launceston via Geelong; Samuel Churchman, for San Francisco; Lavinia, for Moreton Bay; Francis Ridley, for Ceylon; Dart, for Melbourne; Shamrock, steamer, for Launceston via Melbourne, at 5 p.m.

### CLEARANCE.

October 31.—Dart, brig, 154 tons, Captain Collins, for Melbourne; Passengers—Mr. Evans, Mr. Lamb, Miss Eliza Dodger, Miss Ann Dodger, Mr. and Mrs. G. Brown, J. Crow, Mrs. Butler and two children, James Wheeler, Thomas Emerson and wife, James Cunningham, Samuel Allen, Catherine Vaughan, Mrs. Madden, Sarah Coran, Mr. Jones, wife and child, Mr. and Mrs. and Miss Baker, Mr. Murphy, Mr. and Mrs. Warner, Mr. Smith, Mr. Mahan, wife, and three children, Miss Mahan, Miss Clay, Mr. P. Dwyer, Mr. Thomas Piford.

### COASTERS INWARDS.

October 31.—Ruth, 12, Wells, from Pitt Water, with 13 tons wood; Currency Boy, 41, McNeil, from Newcastle, with 52 tons coal; Tamar, steamer, 130, Parsons, from Morpeth, with 11 bags wool, 1 bag wool, 1 hoghead tallow, 103 pumpkins, 39 trusses hay, 30 boxes soap, 10 bags maize, and sundries.

### COASTERS OUTWARDS.

October 31.—Emau, 34, Townsend, for the Bellinger, with sundries; Ruth, 12, Wells, for Pitt Water, in ballast; Currency Boy, 41, McNeil, 26, Mitchell, both for Newcastle, in ballast; Tamar, steamer, 130, Parsons, for Morpeth, with sundries.

### EXPORTS.

October 31.—Dart, brig, 154 tons, Captain Collins, for Melbourne; some merchandise, Bayers, and 100 pieces of 10 kg colonial tobacco, E. V. Gordon, 100 households brandy, 12 cases marble, 5 cases glass, 2 cases guns, Henry Moore; a flour mill, with boilers, machinery, A. John A. Mathews; 8 household brandy, E. H. Pollard; 2 cases cigars, 1 kg and 1 box tobacco, I. M. Leigh; 5 cases oil, 40 kg paint, Charles Chapman; 10 crates 2 cans merchandise, pocket books, George Ross; 4 packages drugs, E. Youngman and Co.; 2 halfир tobacco, E. N. Thompson; 29 packages merchandise, J. D. Day; 12 dry wheat; 6 boxes flour, J. Day; Powell; 5 packages merchandise, J. Dompick; 16 kg paint, 5 cans oil, J. Francis; 1 box leather, Townsend; 1 box books, J. Moore; 74 flagging stones, John Marsh; 34 flagging stones, 19 window sills, Sinclair; 20,000 feet cedar, Sheppard and Algry; 2 cases snuff, W. H. Aldis; 5 bales paper, R. Gill and Co.; 47 bags sugar, 16 sheets tea, 11 bags salt, 2 cases 1 bag oil, 1 case merchandise, 1 bundle spades, 1 grindstone, 1 bundle and 1 bar iron, W. C. Wentworth.

### SHIPS' MAIRS.

Mails will close at the Post Office, as follows:—

For SAN FRANCISCO.—By the Mary Adeline, this evening, at six.

For AMARAT.—By the Mary Ann, this evening, at six.

For HONOLULE.—By the Elisabeth Archer, this evening, at six.

For LONDON.—By the Earl Grey, to-morrow evening, at six.

For SYDNEY.—By the Thomas and Henry, to-morrow evening, at six.

For LAUNCESTON AND PORT PHILLIPS.—By the Shamrock, this day, at a quarter past 4.

The Culloden, for Ceylon; Arabia, for Manila; Phantom, for Adelaide; Samuel Churchman, for San Francisco; and Vixen, for Launceston via Geelong, were all in Watson's dock, at noon. They all attempted to get to sea, but were unsuccessful.

The Tasmania left this port for London on the 11th ultimo, and has returned, having experienced very heavy weather off the South Cape of New Zealand, in which the ship strained and laboured very much during the gale, and as she made a great quantity of water, Captain Tucker considered it prudent to bear up for Sydney. A survey will be held on the ship to-day.

Yesterday, the American flag was hoisted half-mast at night at the office of the U. S. Consul, and also on the American ships in harbour. This was a mark of respect to the memory of the late President—General Taylor. We were pleased to observe that the British ships also adopted the same method of showing respect to the memory of the deceased General.

Cape SHIPPING.—The barque Prince of Wales, from Launceston via the Mauritius, arrived on the 2d at just.

The Susan, 50, Kauai, sailed from Newgate on the 1st instant.

The Conqueror, 100, via Auckland, arrived at San Francisco on the 17th August.

FRIDAY, NOVEMBER 1, 1860.

"Sword is no Master, of no Sect am I."

### THE REPORT ON BANKING.

Our readers cannot have forgotten the extraordinary excitement which prevailed here a few months ago on the subject of Colonial Banking. The discovery of the fact that the English Banks trading in this colony, with a large nominal capital of their own, were actually working for the most part with the capital of their customers,—in other words, lending to the colonists with one hand the money which they took from the public with the other,—and remitting the great bulk of the profits so derived to their non-resident proprietaries, provoked an epistolary discussion, which, for the vehemence of its spirit, the numbers who took part in it, the length to which it was protracted, and, let us add, the ability with which on the whole it was carried on, surpassed, we believe, any controversy ever before witnessed on the arena of the Sydney Press. And the discussion happening first at the commencement of the Legislative Session, it is not to be all wondered at that the subject should have attracted attention in the Legislative Council. The whole of our Banks enjoy certain facilities derived from local enactments, and it was natural and just that the body by whom those facilities were granted should see that there were corresponding securities on behalf of the public. No one, therefore, can reasonably find fault with the honorable member who brought the question formally and fully before the House, nor with the House for instituting the inquiry of which we have now to notice the results. Indeed, it is not unworthy of remark, that the very first Act passed by the first Legislature erected in New South Wales, now twenty-six years ago, had for its object the regulation of the currency. On the 28th September, 1824, under the Govern-

ment of Sir THOMAS BRISBANE, the Council held its first sitting, and placed on the first page of the colonial statute book an ordinance entitled, 'An Act to make Promissory Notes and Bills of Exchange, payable in Spanish Dollars, available, as if such Notes and Bills had been drawn payable in Sterling Money of the Realm.' There was, then, no lack of ancient precedent for legislative interference with our monetary system.

On the motion of Mr. LAMB, a Select Committee was appointed in June last to make those inquiries which the recent discussions out of doors seemed to have rendered expedient and necessary. The Committee were instructed to direct their attention to four questions, namely, 1st, Whether the quarterly returns furnished by the several Banks, and published in the *Government Gazette*, afforded all the information which it was desirable the Government should possess; 2ndly—What was the average amount of public money deposited in each of the Banks, and what the security afforded for the safe custody and due payment of these deposits; 3rdly—Whether it was necessary to make any alteration in the laws respecting the currency of the colony; and, 4thly—Whether any legal enactment was required to regulate or restrain the issue of notes payable on demand by the Banks and by private individuals.

Now, had the gentlemen composing this Committee been men of an officious and speculative turn of mind, here was a fine field for the gratification of their taste, and for the display of their ingenuity. Fortunately for the colony, they had no such turn. That restless spirit of innovation which assumes that any change must be for the better, and which would subject even long-established and well-working systems to the risk of crude experiment, had evidently no existence here. In a plain matter of business, the Committee acted like plain men of business. They submitted to their aid gentlemen of practical habits and matured experience, and thus collected a mass of information which enabled them to avoid rash and to adopt sound conclusions. The result was, that they brought up a Report whose chief excellence is, that, with small exceptions, it proposes to leave things as they are. Finding that our Banks are now conducted on safe principles, their liabilities to the public are at all times amply covered by their assets, the Committee have nothing to recommend concerning them, further than a few alterations in the form of their published returns, and in the nominal lists of their proprietors which the existing law requires to be filed once a year in the Supreme Court. Finding the metallic currency of the colony to be just what the colony requires, so far as it is in the power of legislation to control it, they honestly avow their belief that in the laws by which it is affected, no alteration is at present either necessary or desirable. And finding that the average amount of bank notes in circulation, compared with the population and commerce of the country, so far from being excessive, very moderate, and that so long as these notes are payable in coin on demand, there is no reason to apprehend the possibility of an over-issue, they wisely content themselves with letting well alone.

In short, with the exception of the matters of detail mentioned above, the only particular in which the Report recommends legislative interference is in the case of paper money issued by private individuals, chiefly in the remote districts of the interior, where circumstances seem to render such issues absolutely indispensable. But at the low way in which this kind of circulation has heretofore been managed is found to be productive of great inconvenience, and occasionally of heavy loss, to many persons, especially those of the labouring class, the Committee recommend the enactment of a law obliging the issuers of all such paper, whether in notes, cheques, or orders, to make it payable, on presentation, in sterling money, in some city or town within the colony, subject to a penalty recoverable by summary jurisdiction before two or more justices of the Peace.

Such is the result of the late angry and prolonged agitation on the Banking Question—a result which, while it is creditable to the discrimination and good sense of the Select Committee, must be satisfactory to the colonial public, as showing that their monetary system is conducted in a way so safe, so prudent, so unobjectionable, as to merit their entire confidence in the bodies who work it, as well as in the system itself.

### NOMINATION OF CITY COUNCILLORS.

We beg to remind the citizens that this day, at noon, the nomination for six city councillors takes place at the Town Hall, York-street. We need not repeat, what we have said so lately, that on the result of the forthcoming election will depend, in a great measure, the fate of the City Council. Nor need we state, what must be obvious to every one, that the nomination is a very important step in the election, for if no more than six be nominated, they will be elected on the spot; and, at all events, if good men be not nominated, good men cannot be elected to-day or on the 4th. To-day, then, it will be seen whether the new Act, which has cost so much time and labour, is to be a dead letter, or an improvement on the old. Let the citizens watch carefully and critically the character of the candidates nominated this day; and be prepared to see that the names of at least six properly qualified men of business habits and good standing be submitted, leaving to the citizens the chance and the responsibility of electing men who will really improve the Council. A few good selections will thoroughly reform the corporate body; but let us not forget that new blood is not necessarily good blood, and that unless the citizens will for once get over their apathy, go to the poll, and record their votes for the best candidates, we shall have only a repetition of the old story—the incompetency of the corporation—the waste of the public money—new cries for reform, and when the opportunity for reform arrives, a repetition of the same apathy among the citizens. Again, we repeat that the reform of the Corpora-

tion is in the hands of the citizens, and if they neglect the opportunity, the fault will lie at their own doors.

Any citizen may nominate any six duly qualified citizens as City Councillors.

### LAW INTELLIGENCE.

#### SUPREME COURT.—THURSDAY.

Before their Honors Mr. Justice DICKINSON and Mr. Justice THERY.

year between two of our first-rate Houses, leaders of Paris fashion, completely dispersed the little foyes of intrigue which were偷偷地 gathered there, and drove it to the Visitation. It appears that the girl who is considered in the religious world as a *maistresse femme*, had been left the guardianship of a young girl of great beauty and immense wealth. The child had been left to her care by her aunt, a devotee of the first water, who had expressed the hope that "she would live and die with the abbess," evidently a disguised wish that she might one day take the veil in that country. Some of the old ladies of the suburb, who seem to pass their lives in going from convent to convent, like the old ladies by profession, who frequent the haunts of Connoisseurs, soon discovered this treasure of Chabot, and determined that the sacrifice intended by the stupid old aunt should never be. The girl was nobly born, belonging to one of those families of Alençon, exceedingly beautiful and accomplished, with, moreover, one of the most splendid d'over held out the capacity of the most intrepid fortune-hunter in all France. The *retreats* at the Court of Chabot grew to be more and more frequent, so that the girl became of an age to marry. Not a single high name but sent its representative in some shape or another to this meeting, until the abbess was compelled to send away many very desirable applicants for admittance for want of room to receive them. This was, indeed, a joyous time for the convent. From Palm Sunday to the Tuesday after Easter, not a day was allowed to pass without homage being paid to the chapel in the shape of costly presents, or pictures of condonists, or gilt reliquaries, or pictures of pine, until the abbess had given quite a sumptuous entertainment. Meanwhile, the abbess, attired with the greatest candour, always leaving her greatest regret that her pupil had no vocation for a religious life, and the poor girl, who, in her innate simplicity, expressed her shame to her person, his manners, and his conduct.

"Now, could she do otherwise? She had never seen any other man in her life but the foolish-looking young professor of rhetoric in the convent, whose pink and white countenance, with his long yellow hair, reminded one of the flat stone church looking out over the pupil in the chapel. The grandson of the other lady was the second pretender. A simple collegian, just let loose from his tutor. He, too, was approved by the young lady, though he was far inferior to the professor of rhetoric, which rather offended the old dame, until she remembered that the poor innocent child could have no other standard of comparison. God bless her! Considering the holy and secluded life she had always led. The whole *retreat* was passed in this uncertainty: sometimes the heiress seemed to look towards the road, at others, the collegian carried the day. The two ladies, while gay to hate each other, most cordially; the former for one or the other of the combatants. The saintly abbess looked and smiled at both; the young girl followed with much ardour her devotions, as well as her studies in rhetoric, and when the holy time was over, all parties became clamorous for a decision. Both of the old ladies were full of hope and joy when told by the abbess that the decision of the heiress was already taken, and in few days would be made known to the world. Body and soul in her anxiety, a printed letter arrived to her, giving the announcement "On the part of the Rev. Mother of the Blessed Order of —, at Chabot, of the marriage of her nephew, M. de L., professor of rhetoric at the college of C., with her pupil, Mlle. de F., of Alençon." Suspecting the consternation in the Faubourg Sainte, had departed from the convent, perhaps for ever, but what care the abbess! The chapeau full of treasure, left her. Her Virgin is now in the church of St. Sulpice, adorned with gold embroidery, studded with pearls, and the petrified flake of Saint Pancras spittle is now exhibited on a golden spout; none of your mock Ruols and Eborangs, but real solid gold. She has made herself more popular than the greatest platonist, for she has distributed, no longer than a week ago, a whole pail full of gold chaplets, blest by the young lady, and given to the little children in the great fair day, that were over, all parties became clamorous for a decision. Both of the old ladies were full of hope and joy when told by the abbess that the decision of the heiress was already taken, and in few days would be made known to the world. Body and soul in her anxiety, a printed letter arrived to her, giving the announcement "On the part of the Rev. Mother of the Blessed Order of —, at Chabot, of the marriage of her nephew, M. de L., professor of rhetoric at the college of C., with her pupil, Mlle. de F., of Alençon."

The loose earth which they had excavated was full of fine gold, and only needed washing out. A number of Sonorians were engaged in dry washing this refuse sand; a work which requires no little skill, and is done by the hands of these tank and shanty Arabs of the West. The little tribe of work is following gathering the loose dry sand in bowls, pour it upon their heads and slowly pour it upon a blanket spread at their feet. Repeating this several times, and throwing out the worthless pieces of rock, they reduce the dust to about half its bulk; then balancing the bowl on one hand, by a quick dexterous motion of the other, they cause it to revolve, at the same time throwing its contents into the air and catching them again. In this way the sand is finally winnowed away except the heavier grains of sand mixed with gold, which is carefully separated by the breath. It is a laborious occupation, and one which, fortunately, the American diggers have not attempted. This breathing the fine dust from day to day under a more than torrid sun would soon impair the strongest lungs.—*Taylor's Edomado.*

STATISTICS OF THE PRIMITIVE METHODIST CONNECTION.—The thirty-first annual conference of the Primitive Methodist Connexion, was held in the Cannon-street Chapel, Nottingham, on Wednesday, June 6, 1851. The state of the church—1,000 members; 1,000 converts; 227 missionary districts; 68 churches; 1,000 preachers; 432 missionaries; 87 local preachers; 624 class leaders; 6126 connexional chapels; 1555; rented chapels, 3215; Sunday schools, 1278; Sunday schools, 103,310; teachers, 20,114; deaths of church members, 1507; net increase of church members, 9205. Several important measures adopted for the prosperity of the connexion, and for the welfare of the members. Brethren. Early morning, men taken on trial as travelling preachers; quite fitting to satisfy the conference, and at the conference came in meeting upwards of 10,000 persons attended.

ADVICE ON PARLIAMENTARY ORATORY.—You laugh at my letter on oratory, and my analysis, for your study and improvement, of the style of Brougham and O'Connell. You will find that both are men of colossus dimensions or, but you add, that if you imitate one or the other, you will fall down. I will tell you, my friend, most truly, I wish you, however, to remember, that greatness is only achieved by the adoption of great examples. The natural ease of Brougham, and his burst of whimsical nature, may not be attained by ordinary men; but if you cannot conveniently contemplate great speakers, do not, I conjure you, imitate small ones. In your, the lower house, where is your bright example in oratory? Sir George Grey is probably the best speaker among the Whig chiefs in the House of Commons; but he speaks too fast; and, though clear and elegant, he wants vigour, I think, and force. My favourite, Palmerston, admirable as he is in his matter, occasionally halts; and impediments in oratory are very common, both to the speaker and the audience. If you are a man trained in the principles of the law, you have a genius for speaking, never want words, and feel themselves and make their hearers feel, most keenly what they utter. She is vigorous, Irish, figurative, and often happy; but he is a model for nobody, and must be permitted to shrink in his own wild and peculiar manner, without discipline and without follow. He is clever, but cold; quick and ingenious, but there is no flame of enthusiasm in him. Little boys and girls, and plenty of room on their shoulders, but their legs were naked. A cradle attracted my attention. It consisted of a short board, swung to a horizontal pole, supported at each end by upright sticks. On this cradle was lashed another contented baby. I must not forget the sweet, little, active creature, about twelve years of age, who mixed the millet-dough for the cake, and then attended the baking. She was beautiful, like her mother, and her father, and her brother-in-law, our boatman, seeing the admiration with which I regarded her. He said that, as there was a large and growing family of them, and as they were very poor, they would willingly part with her, believing that she would be infinitely better off if I would condescend to be her protector, than she could be if she remained there. "For," continued he, "what can she expect, what is wanted, in a manufacturer's house?" I replied, "I have the best, the fairest, the gentlest, and most obedient servant,

THE DERBY DAY.  
(From the Spectator.)

Mavis, perhaps, did the grand day at Epsom forth such vast multitudes by all the outlets of London, as the session on the scantiest occasion, few seasons back, with the report of improved attendance more recently, the latter season as to cash—the beautiful weather—all conspired to parade the increasing popularity of the metropolis as represented on Queen's Downs. The spectacle in town was peculiar: the points of departure were more numerously swarming than ever; the Piccadilly Circus looked as if some accident had happened; the people were so thick and so piecemeal, that every road, street, and corner, even the way by Kingston was crowded, almost like the Tooting road used to be, to win the memory of men—that is of men, some. The ground, of course, was only a multitude of exasperation of its former self. Some were more multitudinous than of old, perhaps in the ratio of men to coaches—an effect of the muddle. Yet London developed amazing resources in the way of four-horse coaches and six-horse traps, omnibuses, and cabs. All the rest of the day, the grand stand and the boxes, were the way to Ascot, only for the last few hours, when the racing was over, the spectators, though quite fit to satisfy the conference, and at the conference came in meeting upwards of 10,000 persons attended.

A NEW THIRPENTER AND FIRE ALARM.—Capt. Joseph Nijs, C.B., was appointed on Wednesday to the Agincourt, ordinary depot, Devonport, vice Johnston to Albion. Captain Nijs entered the navy November, 1807. He served in Captain Sir E. Parry's ship, Alexander, in the north-west passage expedition, under Sir John Ross; and in 1819 again proceeded with Parry to the Arctic Regions. Was promoted to the rank of Lieutenant in December, 1820, and in 1821 he made the passage with Sir Parry, where he returned in 1823. He was promoted to the rank of commander for Navarin, having been first Lieutenant of the flag-ship Asia in that affair; and from 1828 to 1830 commanded the Alacrity, 10, in the Mediterranean. He obtained his present rank in 1835. He commanded the Herald, 20, in May, 1838, and commanded her for five years, during which period he served in the operations against the Chinese, particularly the action with the Bogue Forts, February, 1841, against Canton. During the ensuing month, for which he obtained his C.B.

OUR NATIONAL MUSEUM.—England must confess to some touch of meanness in her character, at least in our day. As a nation we are mean, and we show it. In one week you may find several traits. Here is Lieutenant Waghorn, who has conspicuously rendered services to his country, or "electric" or galvanic agent, the instant intelligence of "Fire" or "Thieves," ringing bells, etc., etc., and the damage done to the property and whereabouts of the damage. The most striking point in this invention seems to be its simplicity and its utter certainty, which will enable any one, however unscientific, to understand and apply it. It entails no working expenses, and gives no trouble further than that of winding up the alarm if it have run down. By the courtesy of the patentee I was allowed to put it to the test, and the result in every instance exceeded my anticipations. The most general opening of doors, windows, which had been closed, invariably gave an instant alarm of "Thieves." Thus, when the lighting of a gas ring in the room "protected" by the thermometric arrangement caused the alarm of "Fire" to be raised in less than 100 seconds, it is evident that an ordinary thermometer in the same room at the usual height for observation had risen to 68 or 70 degrees Fahrenheit. The patentee has, I believe, just concluded arrangements with one of the first philosophical instruments makers in England, to whom he will shortly be able to sell himself entirely of this admirable invention. Amongst country gentlemen and clergymen, and indeed the whole class of people occupying lone and insulated houses, its popularity will be enormous. Had the church burnt down at Limehouse the other day been fitted up with one of these first outbreaks of fire would have rung the bells and alarmed the neighbourhood. This is another and a great advance towards "science made useful." *London Correspondent of the New-York Tribune.*

GOLD DUST.—The first party we saw had just succeeded in cutting a new channel for the shrunk waters of the Molokai, and were commencing operations on about twenty yards of the river-bed, which they had bare. They were ten in number, and their only implements were shovels, a rude cradle for the top layer of earth, and flat wooden bowls for washing out the sand. Baptiste took one of the bowls which was full of sand, and began to wash it, then the company of twenty-four men were sent to the forenoon about three pounds; we watched them at their work till the evening, when three pounds more were produced, making an average of seven ounces for each man. The gold was of the purest quality and most beautiful colour. When I first saw the men, carrying heavy stones in the sun, standing nearly waist-deep in water, and grubbing with their hands in the gravel bed, I was full of awe, and the scene showed me that the work of these savages must be difficult. The company had made in the forenoon about three pounds; we watched them at their work till the evening, when three pounds more were produced, making an average of seven ounces for each man. The gold was of the purest quality and most beautiful colour. The gold was of the purest quality and most beautiful colour. When I first saw the men, carrying heavy stones in the sun, standing nearly waist-deep in water, and grubbing with their hands in the gravel bed, I was full of awe, and the scene showed me that the work of these savages must be difficult. The company had made in the forenoon about three pounds; we watched them at their work till the evening, when three pounds more were produced, making an average of seven ounces for each man. The gold was of the purest quality and most beautiful colour. When I first saw the men, carrying heavy stones in the sun, standing nearly waist-deep in water, and grubbing with their hands in the gravel bed, I was full of awe, and the scene showed me that the work of these savages must be difficult.
